

# Concerns about **PHARMACY BENEFIT MANAGERS**

Little transparency

Lack of government oversight

Unfair playing field for mom-and-pop pharmacies

## **FAST FACTS:**

U.S. health care is a \$3.3 trillion/year industry. Prescription drugs make up 10% of that cost, or \$330 billion.

Pennsylvania paid \$2.86 billion to pharmacy benefit managers in 2017 – a 100% increase from \$1.41 billion in 2013.
