COMMONWEALTH OF PENNSYLVANIA
PUBLIC EMPLOYEE RETIREMENT COMMISSION
HARRISBURG
17120

January 2011

To: Members of the Pennsylvania General Assembly
and Governor Corbett

The Commission is hereby submitting its thirteenth biennial report on the status of the Commonwealth's 3,200 local government pension plans for your review and information. These regularly issued status reports are an essential component of the oversight of local government pension plans exercised by the Governor and General Assembly. This oversight is warranted because Pennsylvania's pension plans for local government employees, when viewed in the aggregate, represent one of the largest retirement systems in the nation.

In conjunction with its mandated responsibility to coordinate policy development for the Commonwealth's public employee retirement systems, the Commission endeavors to use the status reports on local government pension plans to focus the attention of State policymakers on the specific issues and reform measures that it views as warranting attention. More than two decades have passed since the first status report was issued pursuant to the Municipal Pension Plan Funding Standard and Recovery Act (Act 205 of 1984), and the Commission believes it is time for the Commonwealth to move beyond that landmark municipal pension reform statute.

First, the provisions of Act 205 of 1984 need to be updated to reflect the passage of time and expanded to accommodate new circumstances. Second, legislation to begin the necessary consolidation of municipal pension plans needs to be enacted. And finally, the pension plan reporting standards applicable to all cities, boroughs, townships and authorities need to be extended to counties.

On behalf of the Commission, I am hopeful that you will find this report to be informative and useful. It serves to provide basic information on Pennsylvania local government retirement systems and to convey the Commission's plan to systematically address the many local government retirement issues that require your attention. Through a series of special reports, the Commission has endeavored to address individual issues by providing background information and suggested resolution. Through your attention and subsequent deliberations, the comprehensive policy guidelines needed for the Commonwealth's local government retirement systems can be established.

Sincerely,

A handwritten signature in black ink, appearing to read "Anthony W. Salomone".

Anthony W. Salomone
Chairman

PREFACE

The following report contains data and discussion on the local government pension plans of the Commonwealth. For the purposes of this report, the local government pension plans established by municipalities subject to the reporting requirements of Act 205 of 1984 are termed "municipal pension plans," while the local government pension plans established by counties that continue to report under the provisions of Act 293 of 1972 are termed "county pension plans." Where data is combined for municipal and county pension plans, the report uses the term "local government pension plans."

The data presented in the report was extracted from the individual pension plan reports containing actuarial, financial and demographic information. The municipal pension plan reports submitted under Act 205 requirements covered the 2009 plan year, while the county pension plan reports submitted under Act 293 requirements covered the 2008 plan year. Throughout the filing periods, the Commission endeavored to ensure the reported data was complete and accurate. To the degree possible, the data provided in the individual reports was reviewed for completeness and internal consistency. In extracting the data from the database and in compiling this report, the Commission endeavored to minimize typographical errors and omissions.

When this report was prepared for publication, thirteen municipalities with one or more municipal pension plans remained delinquent in submitting the required Act 205 reports for the 2009 plan year. Consequently, data for at least sixteen municipal pension plans could not be included in this report. However, the omitted data is not statistically significant due to the small size of the pension plans involved.

PART I

EXECUTIVE SUMMARY

GENERAL CHARACTERISTICS

Pennsylvania's local government pension plans comprise more than 25 percent of the public employee pension plans in the United States. There are now more than 3,200 local government pension plans in Pennsylvania, and the number is continuing to grow. Seventy-one percent of the local government pension plans are self-insured, defined benefit plans, and 29 percent are money purchase or other type plans. The pension plans range in size from one to more than 20,000 active members, but more than 98 percent of the pension plans can be characterized as small (less than 100 members). While 67 percent of the local government pension plans have ten or fewer members, 29 percent have three or fewer active members.

FUNDING STATUS

The rapid annual growth rate (10%) of unfunded actuarial accrued liabilities prior to the passage of Act 205 of 1984 was reduced to about two percent between 1985 and 1997. Between 1997 and 2001, the total unfunded actuarial accrued liabilities of local government pension plans decreased from \$3.7 billion to \$2.0 billion, primarily due to the issuance of bonded debt. Between 2001 and 2009, the total unfunded actuarial accrued liabilities increased significantly due in large part to the reduction in the market value of assets caused by economic conditions.

COMPLIANCE WITH MINIMUM FUNDING STANDARD

The reported data shows that municipalities failed to comply with the actuarial funding standard in 87 instances in 2008. As a result of enforcement activities of the Commission, instances of noncompliance have become a less significant factor in the funded condition of municipal pension plans since the enactment of Act 205 of 1984.

IMPACT OF CHANGES IN STATE AID ALLOCATION

Both under-funded and over-funded municipal pension plans continue to decrease in number since the enactment of Act 205. This reduction in numbers of plans outside a "normal range" is an indicator of an effective allocation formula. Between 1985 and 1989, the total State aid allocated under Act 205 increased dramatically, and the unit value increased from \$1,146 to \$3,269. The unit value decreased to \$2,501 in 1990 and has since climbed to \$3,235. In 2010, State aid was sufficient to fully fund pension costs in 34 percent of municipalities, or approximately 8 percent of the active membership.

AMENDMENT TO ACT 205 OF 1984

Act 44 of 2009 was signed into law by the Governor on September 18, 2009, and makes numerous, significant changes to the Municipal Pension Plan Funding Standard and Recovery Act (Act 205 of 1984). Acknowledging the current economic climate, Act 44 makes available a number of actuarial tools intended to provide short-term fiscal relief to local governments operating public pension plans. The Act also regulates the establishment and operation of Deferred Retirement Option Plans (DROPs), establishes new conduct and disclosure standards for professional service contracts applicable to municipal pension systems, and provides special remedies applicable to the cities of Philadelphia and Pittsburgh.

ADDITIONAL REFORM NEEDED

Fundamental problems inherent in the administrative and legislative structure of Pennsylvania local government pension plans are not being addressed by Act 205. Pennsylvania's local government pension plans are governed by numerous disjointed statutes and can be characterized as technically deficient and outmoded.

Problems that evidence the need for reform outside the parameters of Act 205 include:

- *Proliferation of small plans.* Sixty-seven percent of the Commonwealth's municipal pension plans have ten or fewer active members. Per-member administrative expenses associated with small plans are disproportionately large and other functions are absent or inadequate.
- *Deficient retirement codes.* The statutory framework is fragmented, portability is limited and there is substantial disparity in the provision of retirement benefits. One of the largest public employee retirement systems in the nation cannot function efficiently and effectively without adequate policy guidelines.

The administration of Act 205 has resulted in basic reform. Having implemented actuarial funding of local government retirement plans, it has averted the potential insolvency of multiple municipal retirement funds. Act 205 has been successful and continues to be successful, but it does not address the fundamental issue of structure. Administrative and structural reform of local government pension plans continues to be a priority for Commission activity.

PART II

GENERAL CHARACTERISTICS

NUMBER OF PLANS

Pennsylvania has a complex system of local government comprised of more than 4,600 governing units. General purpose local governments — cities, boroughs, towns and townships — total approximately 2,600 governing units. Special purpose local governments — municipal authorities — total approximately 2,000 units, and counties total 66 units. General purpose local governments in Pennsylvania, in most instances, establish separate pension plans for their police, fire and nonuniformed employees, while counties and municipal authorities generally establish one pension plan for all employees.

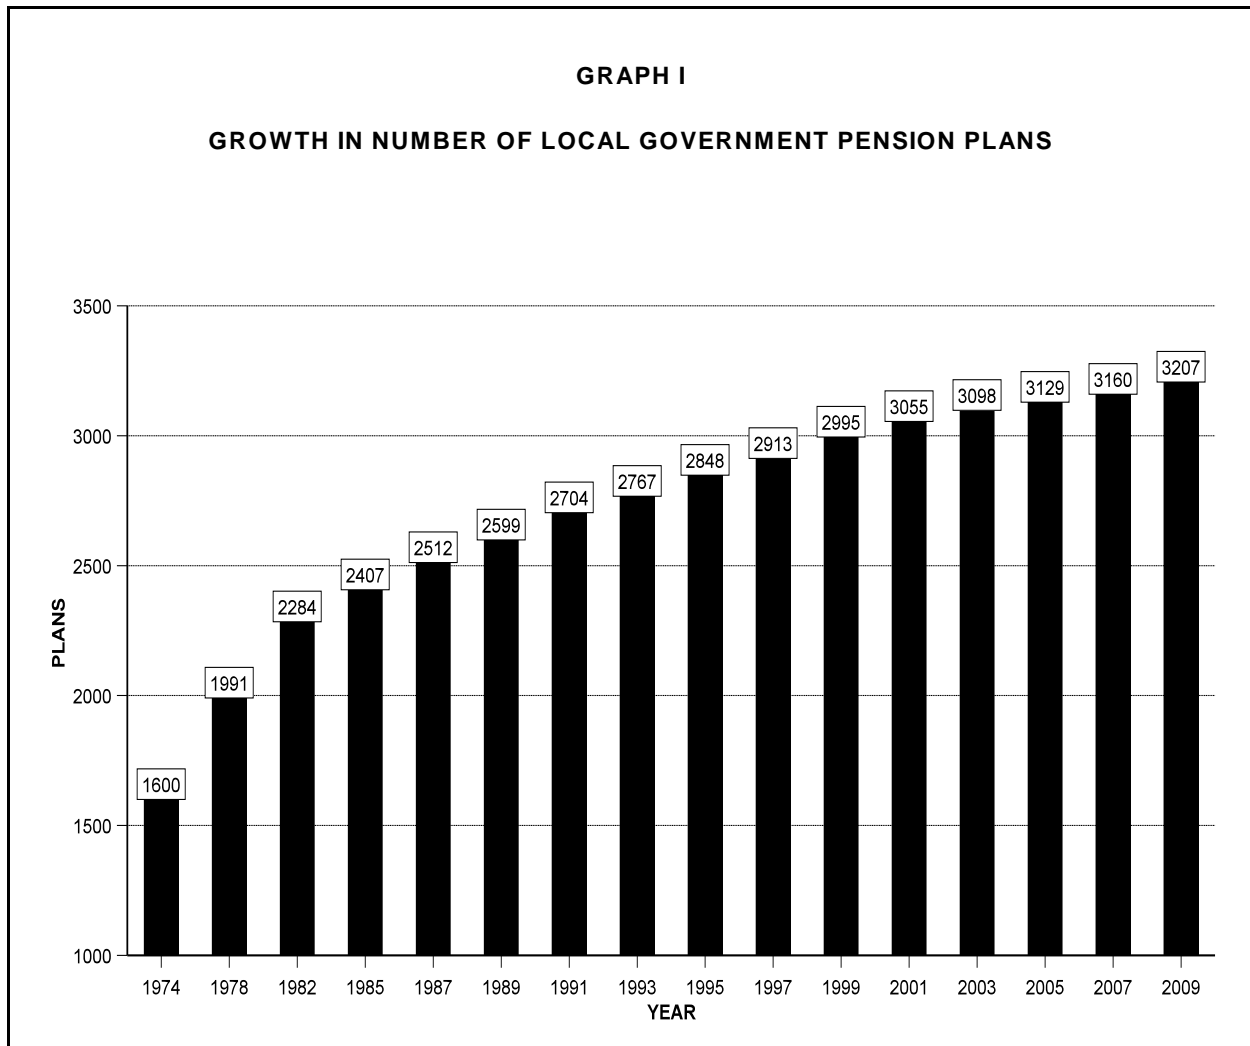

The local government pension plans in Pennsylvania are estimated to comprise more than 25 percent of the total number of public employee pension plans in the United States. With more than 3,200 local government pension plans, the Commonwealth has more than four times as many public employee pension plans as any other state. Chart I shows the number of local government pension plans grouped by the type of employee and by the type of local government as of 2009.

CHART I

NUMBER OF LOCAL GOVERNMENT PENSION PLANS

	Police	Fire	Nonuniformed	Total
County	0	0	72	72
City	58	45	64	167
Borough	483	21	572	1,076
Township (1 st Class)	88	7	104	199
Township (2 nd Class)	304	8	830	1,142
Authority	0	0	493	493
Council of Government	30	0	28	58
Total	963	81	2,163	3,207

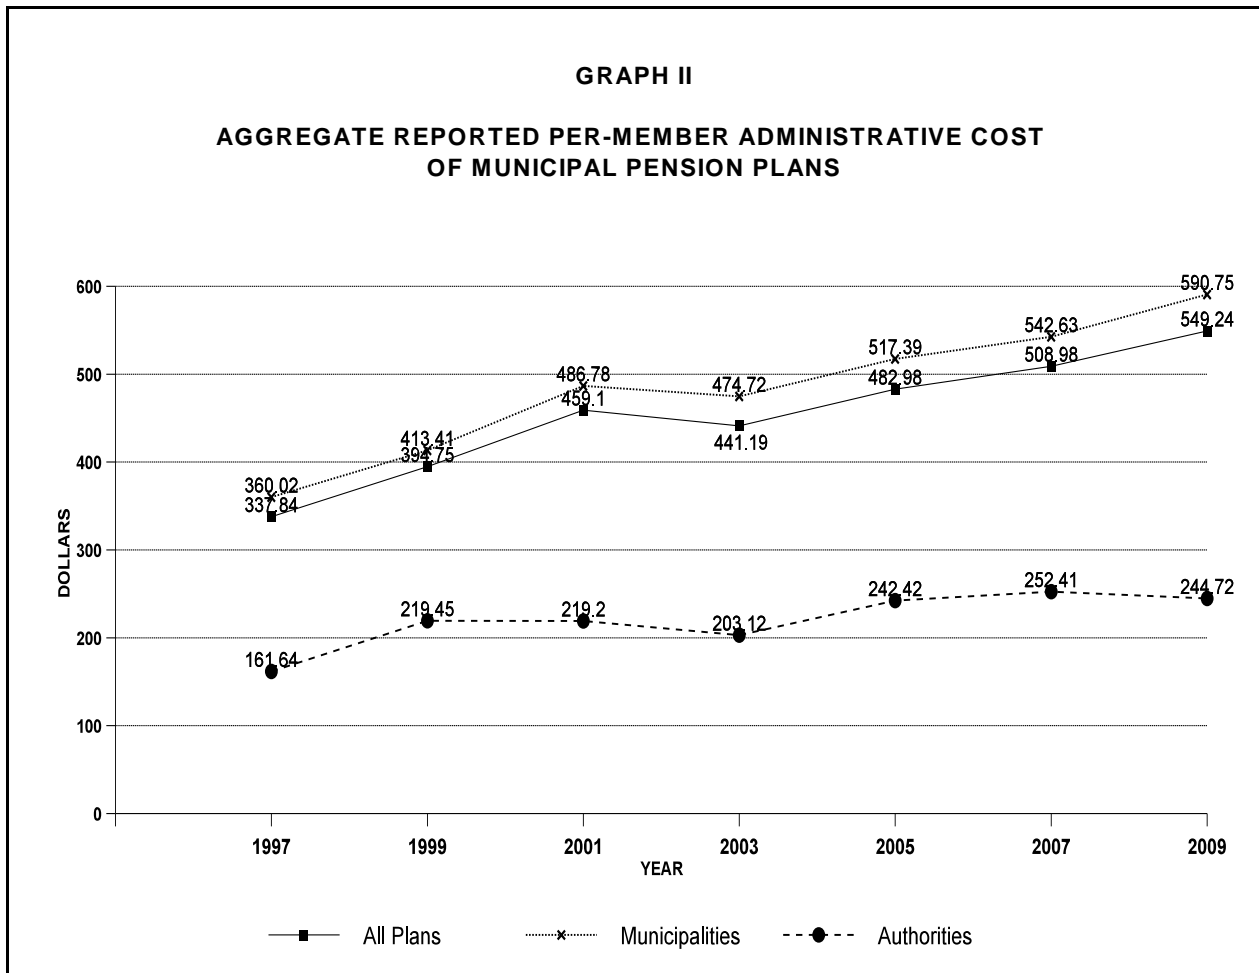

The more than 4,600 local government units in Pennsylvania have the potential to establish in excess of 7,000 pension plans. Graph I shows the growth in the number of local government pension plans since State reporting requirements were initiated in 1974. Although reporting irregularities, varying reporting criteria, and a reporting frequency change affected the data, the general trend is clear — the number of local government pension plans in the Commonwealth is continuing to increase. Since the 2007 reporting period, the net number of pension plans reported has increased by forty-seven. Only three of these additional pension plans have 10 or more members.

ADMINISTRATIVE COST

The aggregate administrative expenses reported for municipal pension plans in 2009 totaled \$39.4 million. The reported administrative expenses are understated because they typically include only direct administrative expenses and because municipalities that utilize asset managers frequently pay administrative costs through a reduction of income distribution rather than a payment made from plan assets. Also, the reported administrative expenses in the very small (10 or fewer active members) pension plans are understated because they are frequently money purchase plans that do not have a mechanism for reporting administrative expenses.

When stated on a per-member basis, an accurate disclosure of administrative costs of municipal pension plans can be used as a measure of the relative efficiency of pension plan administration. Even using reported expenses, some useable information can be obtained. The aggregate administrative cost reported by the 2,508 municipal pension plans that reported administrative expenses in 2009 was \$39.4 million, or \$549.24 per member. This level of aggregate per-member administrative cost reflects an increase of 7.9 percent when compared with the \$508.98 aggregate per-member administrative cost reported in 2007. The continuing escalation of the administrative expenses for municipalities, as shown in Graph II, may be partially attributable to the level of State aid, which in many cases fully covers the administrative expenses and thus reduces the incentive for municipalities to contain costs. The authorities' reported administrative expenses are less than half of the municipal costs. This may be attributable to the fact that authorities have never received State aid to reimburse those expenses.

The relationship between the size of municipal pension plans and the level of administrative expenses may be examined using per-member administrative cost data. To provide the most valid comparison, the aggregate per-member administrative cost data was adjusted to eliminate sources of known distortion. The adjustment restricted the pension plans included in the size-based comparison to only defined benefit municipal pension plans with at least one active member and no known understatement of administrative expenses. The adjustment results in the comparison being based on the administrative expenses reported for 1,291 defined benefit municipal pension plans. Chart II shows that the small size of most municipal pension plans in Pennsylvania increases the statewide cost of administration.

CHART II

PER-MEMBER ADMINISTRATIVE COST FOR SELECTED MUNICIPAL PENSION PLANS BASED ON PENSION PLAN SIZE

Pension Plan Size	Per-Member Administrative Cost
10 or fewer Active Members	\$1,440.62
11 to 100 Active Members	\$1,008.63
More than 100 Active Members	\$445.38
More than 500 Active Members	\$403.73

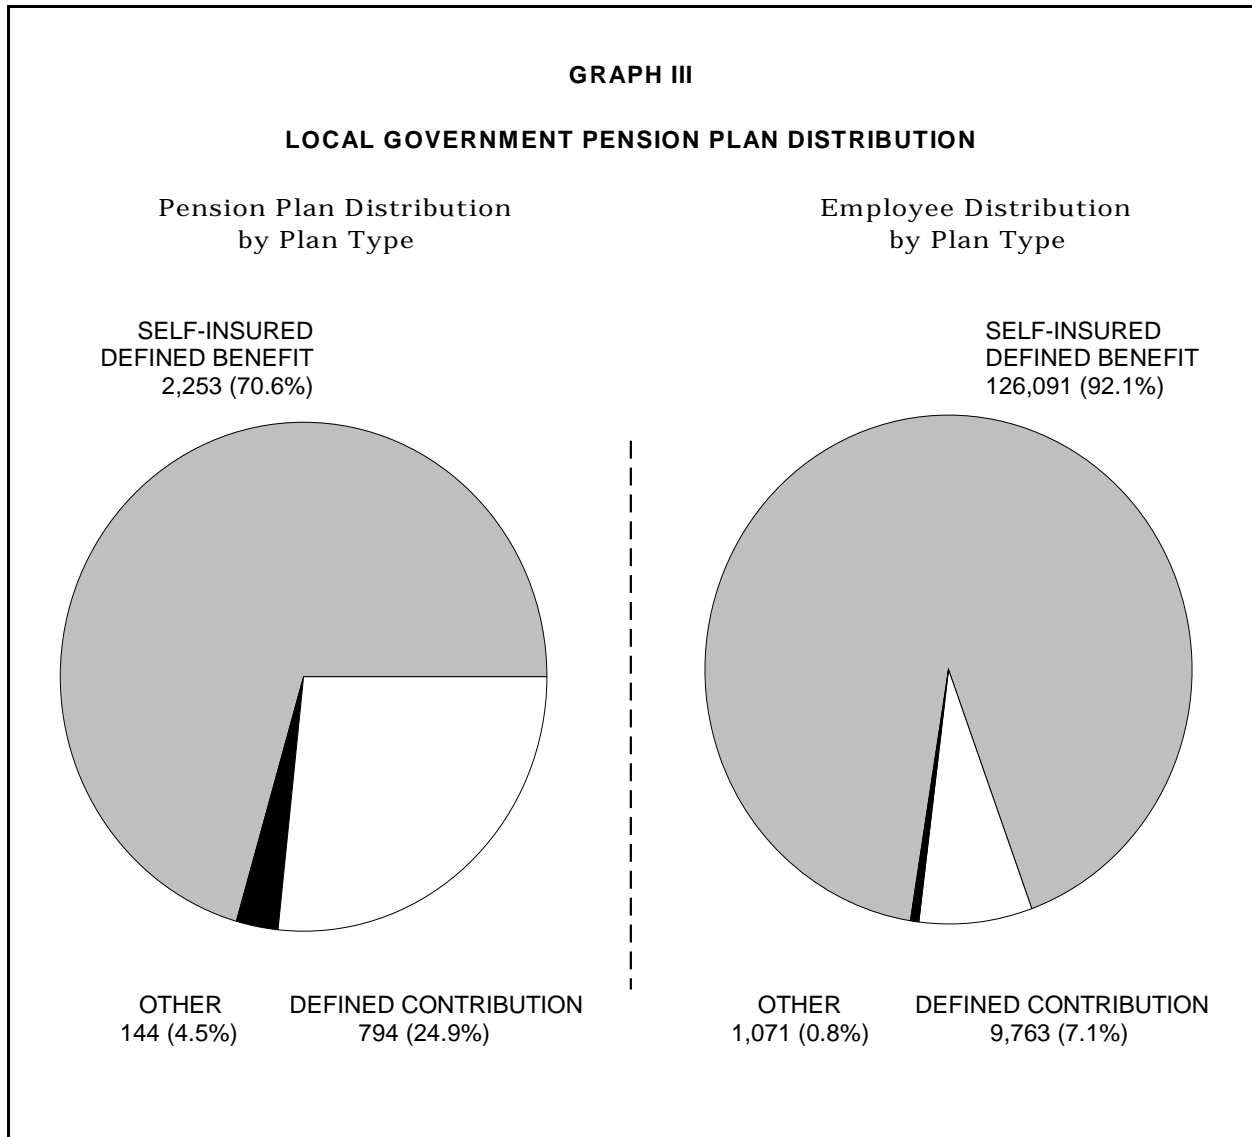

As shown in Chart II above, per-member administrative expenses are proportionately higher among smaller pension plans. If the 2009 per-member administrative costs associated with large pension plans (\$403.73) were applied to the municipal pension plans that reported administrative expenses instead of the administrative costs actually incurred by those plans (\$39.4 million), the annual savings to the 2,508 municipalities would total more than \$10.4 million — showing a potential for a 26.5 percent reduction in ongoing administrative costs.

NATURE OF PLANS

The municipal pension plans included in this report may be categorized as defined benefit or money purchase pension plans. In defined benefit pension plans, the pension benefit to be payable at retirement is fixed in some manner and a resultant actuarial liability is established and funded. Defined benefit pension plans may be characterized as “fully-insured” or “self-insured.” In fully-insured pension plans, fund assets are allocated to individual members through insurance instruments prior to retirement and the insurance is sufficient to guarantee the pension benefits at retirement. Defined benefit pension plans characterized as self-insured are those plans where some or all of the risk of providing pension benefits remains with the municipality, even though the plan may have an insurance component. In some instances, defined benefit pension plans are provided by municipalities through participation in Taft-Hartley Act collectively bargained, jointly trustee, multi-employer pension plans. In 2009, the defined benefit pension plans established by local governments included 2,253 self-insured pension plans and three fully-insured plans. Defined benefit pension plans were also provided by 92 local governments through jointly trustee, multi-employer pension plans.

In money purchase pension plans, the pension benefit is determined by the monies accumulated in the retiring employee’s account up to the time of retirement. Money purchase pension plans may be funded with defined contributions or less formal funding mechanisms, both of which allocate monies to the individual member accounts prior to retirement. In 2009, the 832 money purchase pension plans established by Pennsylvania’s local governments were comprised of 794 defined contribution pension plans and 38 pension plans with no scheduled funding method. In addition to the defined benefit and defined contribution plans, pension plans were also maintained by 11 local governments where no active, vested or retired employees exist at the present time. Our analysis does not include 16 known local government pension plans (12 defined contribution plans and 4 defined benefit plans) that were delinquent in filing actuarial valuation reports at the time this report was prepared, as reported in Table VI.

A major distinction between the “defined benefit” (DB) and the “defined contribution” (DC) approach is most significant in the placement of the risk associated with investment earnings over the period of employment. The fixed benefit in a DB pension plan means that the investment experience affects the contribution requirements, increasing them when earnings are lower and decreasing them when earnings are higher. The fixed contributions in a DC pension plan mean that the investment experience affects the benefit amount, increasing it when earnings are higher and reducing it when earnings are lower. Therefore, the employer, as the residual contributor, bears the investment risk in a DB pension plan, and the employee bears the investment risk in a DC pension plan.

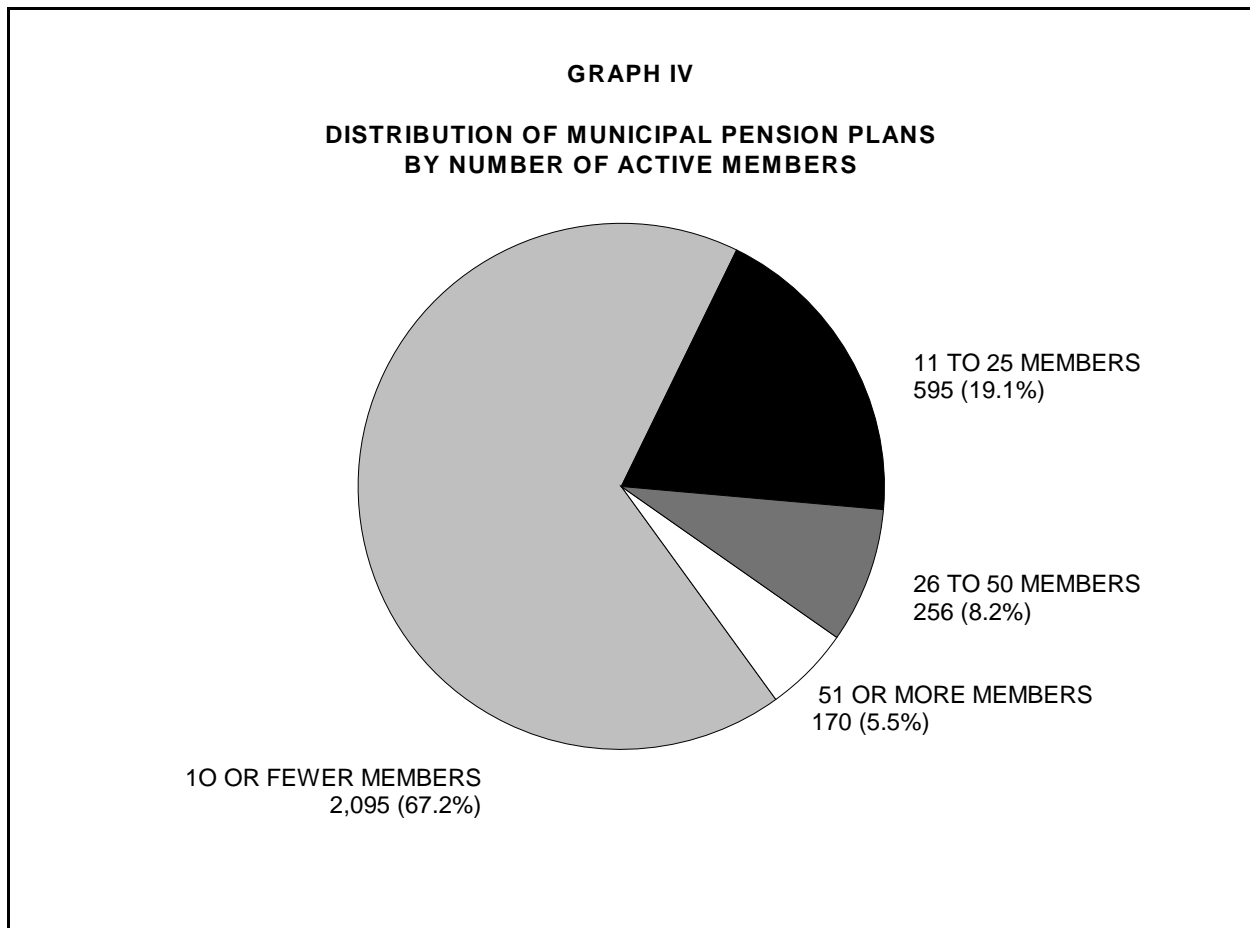

Graph III shows that approximately 70 percent of the local government pension plans in Pennsylvania were self-insured, defined benefit pension plans, while 92 percent of the State’s local government employees with pension benefit coverage were members of self-insured, defined benefit pension plans. The graph also evidences that defined contribution pension plans represented approximately 25 percent of the local

government pension plans in the Commonwealth and that defined contribution pension plans represented only about 7 percent of the local government employees for which pension coverage was provided.

There were 58 new pension plans established since the 2007 reporting period. Of the 58 new plans, 31 were defined contribution pension plans with a total of 150 new members. There were 27 new defined benefit plans with a total of 90 new members. The trend of new plans is shifting away from the traditional defined benefit pension plan to some form of a defined contribution pension plan.

SIZE OF PLANS

Not considering Philadelphia, which has a total of 28,632 active members (more than 20,000 active members in the nonuniformed pension plan), the municipal pension plans in Pennsylvania range in size from one to more than 1,700 active members. Surveys of public employee pension plans frequently use a threshold of 100 active members to categorize public employee pension plans as either small or large. Using a standard of 100 active members, 98 percent of Pennsylvania's pension plans (3,054) are small. Establishing the standard at 50 members, or one-half the usual standard, only decreases the percentage of Pennsylvania's municipal pension plans categorized as small to 94 percent. Graph IV shows that pension plans with 10 or fewer active members comprise more than 67 percent of Pennsylvania's municipal pension plans and that only about 14 percent of the municipal pension plans in the Commonwealth have more than 25 active members. While not specified by Graph IV, 933 municipal pension plans (30%) have 3 or fewer active members.

The 72 county pension plans in Pennsylvania range in size from plans with as few as 14 active members to one plan with more than 7,000 active members. Most counties maintain one employee pension plan, although several counties have more than one. On average, the county pension plans have approximately 817 active members.

CHART III

**DISTRIBUTION OF COUNTY PENSION PLANS BY THE
NUMBER OF ACTIVE MEMBERS**

Number of Members	Number of Plans
100 or fewer	8
101 – 200	14
201 – 300	8
301 – 400	7
401 – 500	6
501 or more	29

When considered in the aggregate, the local government pension plans of the Commonwealth are the equivalent of a very large public employee pension system. Chart IV presents data to permit a comparison of municipal government retirement systems and county government retirement systems. It must be pointed out that size is a valid comparison, but the assets and liabilities are an unfair comparison. The cost method used in all of the municipal plans is the same, entry age normal, while most of the county plans use the aggregate cost method. Also, most of the county plans have a similar benefit structure (a hybrid plan consisting of a defined benefit portion funded by the employer and a defined contribution portion funded by the employee), while the municipal plans vary widely.

CHART IV

**MUNICIPAL GOVERNMENT RETIREMENT SYSTEMS
COMPARED WITH COUNTY GOVERNMENT RETIREMENT SYSTEMS**

	Active Members	Actuarial Accrued Liability	Actuarial Assets	Unfunded Actuarial Accrued Liability
Municipal Government Retirement Systems	78,098	\$18,926,649.610	\$11,957,415,704	\$7,197,030,510 ¹
County Government Retirement Systems	58,827	\$7,202,907,183	\$6,972,999,944	\$290,730,513 ¹

¹ Represents total of unfunded actuarial accrued liabilities reported for individual pension plans.

PART III

FUNDING STATUS AND PRACTICES

ACTUARIAL FUNDING METHODS AND POLICY

Most (97%) of the 2,253 self-insured, defined benefit local government pension plans in the Commonwealth are required to be funded in accordance with the actuarial funding standard established by Act 205 of 1984. The remaining self-insured, defined benefit local government pension plans — the county pension plans — are required to fund their employee pension plans on an actuarial basis, but there is no specific actuarial funding standard established for county pension plans. The Act 205 funding standard established for self-insured, defined benefit municipal pension plans is based on the entry age normal actuarial cost method. Since both the State Employees' Retirement System and the Public School Employees' Retirement System also use the entry age normal actuarial cost method, county pension plans are the only self-insured, defined benefit public employee pension plans in Pennsylvania not required by statute to use the entry age normal actuarial cost method for funding and reporting purposes.

Under Act 205 of 1984, the 938 local government pension plans that do not have self-insured, defined benefits are required to be funded at a level sufficient to satisfy the annual funding requirements specified in their plan documents. Forty-six pension plans with defined contributions that may have experienced funding deficiencies in 2008, as indicated by their 2009 Act 205 reporting forms, were sent funding deficiency notices as part of a Commission effort to enforce compliance with the municipal funding standard among municipalities with money purchase plans. The Department of the Auditor General was notified of the reported deficiencies in an effort to aid in its audit planning and examination process for municipal defined contribution pension plan funding compliance.

ACTUARIAL FUNDING STATUS

The liabilities of money purchase pension plans equal the assets at retirement, and as a result, when contributions are made as specified in their plan documents, they are fully funded by virtue of their design. For fully-insured, defined benefit pension plans, the value of the pension plan's insurance policies equal the liabilities at retirement. Multi-employer, jointly trustee, Taft-Hartley Act collectively bargained pension plans are treated like defined contribution pension plans with respect to funding requirements. Accordingly, analysis of the funding status of these fully-funded municipal pension plans is not necessary.

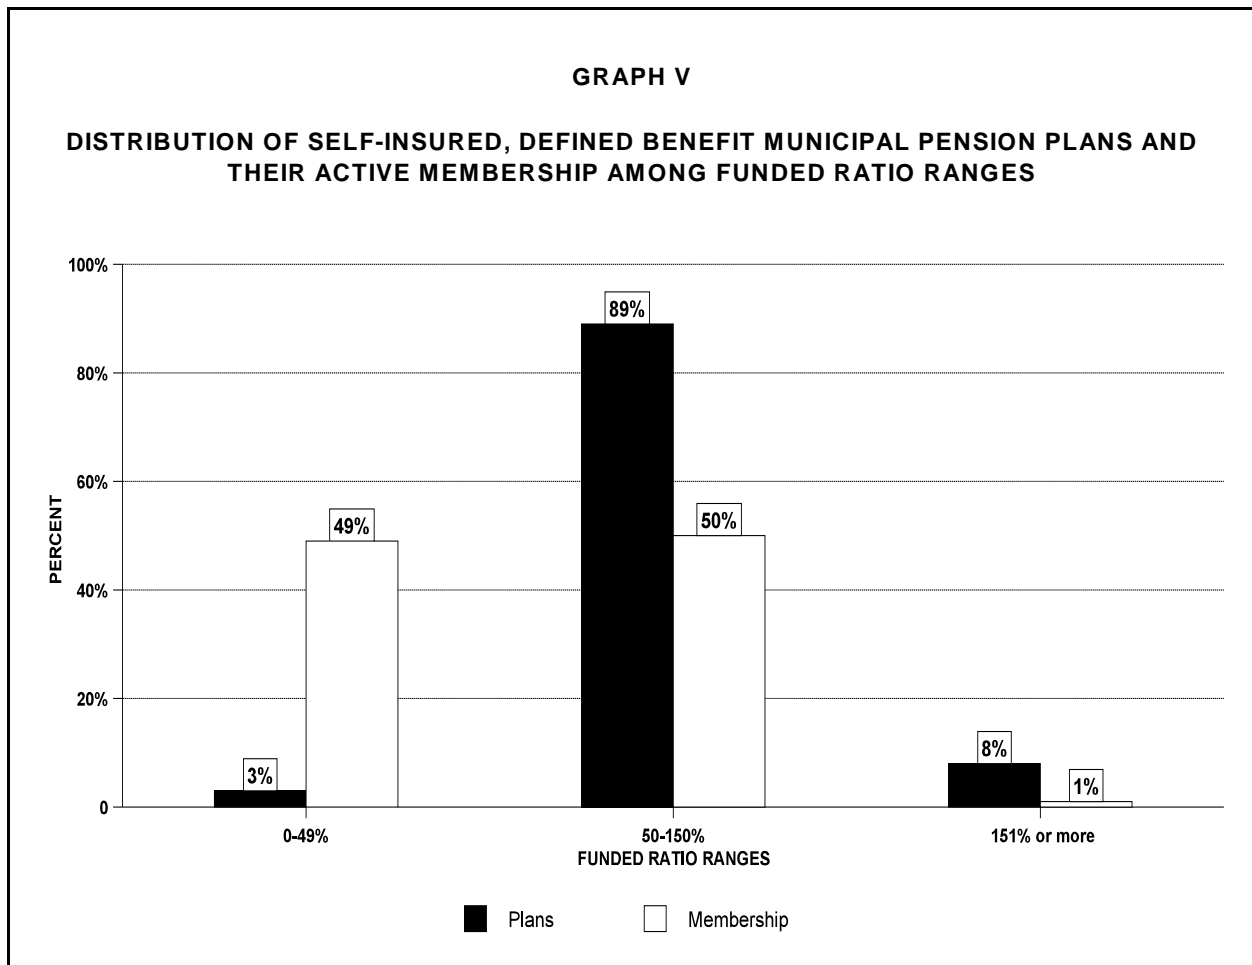

The funding status of the 2,253 self-insured, defined benefit local government pension plans in the Commonwealth varies considerably. An easily understood and reliable method to gauge the funded status of municipal pension plans is available by virtue of the standard use of the entry age normal (EAN) actuarial cost method required by Act 205 of 1984. Because 51 of the 72 county pension plans did not use the entry

age normal actuarial cost method, the following discussion of the funding status of local government pension plans only concerns the 2,181 self-insured, defined benefit municipal pension plans.

The EAN actuarial cost method provides for the even distribution of pension costs over the working career of individual employees. Accordingly, the assets of the pension plan may, at any time, be compared with the total value of the contributions that would have normally been made to the plan to date. The total value of the normal contributions to date is termed the actuarial accrued liability. By computing the funded ratio — the assets expressed as a percentage of the actuarial accrued liability — the pension plan's current funding status is made apparent. For example, when the funded ratio of a municipal pension plan is 100 percent, the assets are equal to the actuarial accrued liability and the pension plan is currently funded exactly on target with the actuarially estimated requirements.

Situations where the funded ratio is exactly 100 percent are rare. In most instances, the funded ratio is greater or less than 100 percent. When the funded ratio is less than 100 percent, the pension plan's assets are less than the currently estimated liabilities and an actuarial deficiency, termed an unfunded actuarial accrued liability, exists. When the funded ratio is greater than 100 percent, the pension plan's assets are greater than the currently estimated liabilities and an actuarial surplus exists. The funded ratio for each municipal pension plan in the Commonwealth is reported in Table I.

Funded ratios above and below 100 percent are not significant unless there is a substantial deviation. Due to normal fluctuations in actuarial cost estimates and other factors, there is an acceptable range in a

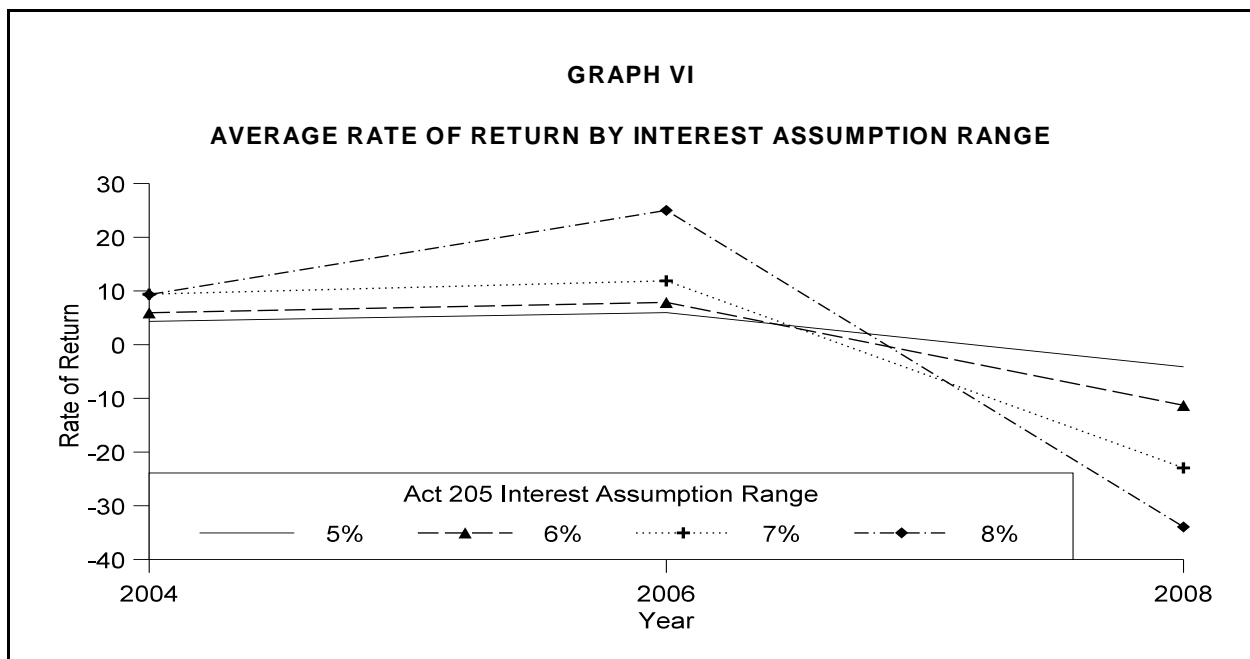

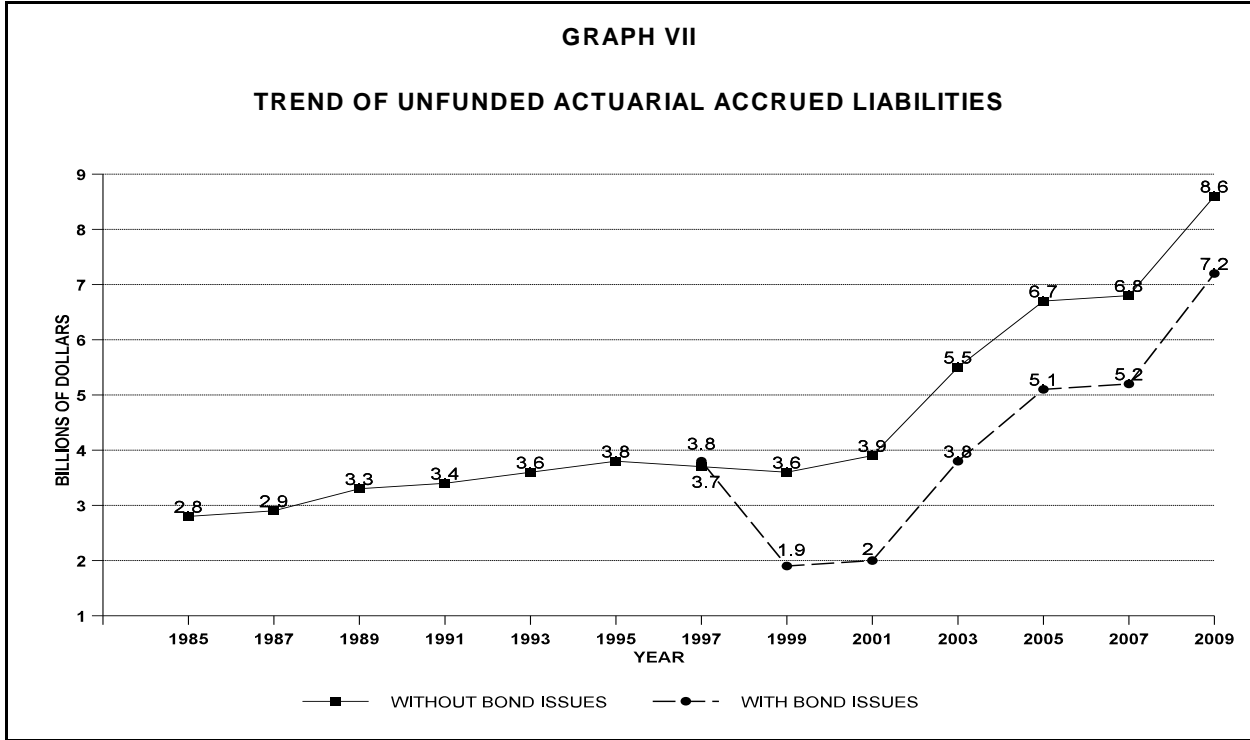

pension plan's funded ratio. The distribution of the 2,181 self-insured, defined benefit municipal pension plans in Pennsylvania among funded ratio ranges is examined in Graph V, which indicates that 89 percent of the pension plans and 50 percent of the membership resided in a 50 to 150 percent funded ratio range in 2009. The membership in this range took a dramatic drop from 93 percent in 2007, but all but one percent of the change can be attributed to the city of Philadelphia falling below 50 percent for each of its plans. In 1985, prior to the establishment and enforcement of actuarial funding under Act 205, only 58 percent of the pension plans and 30 percent of the membership resided in a 50 to 150 percent funded ratio range. This improved tendency for municipal pension plans to operate within the normal funded ratio range is primarily attributed to the enactment and administration of Act 205, which initiated an actuarial funding standard for municipal pension plans and implemented a more efficient formula for allocating the State aid provided to municipalities to offset their employee pension costs.

CHANGES IN UNFUNDED ACTUARIAL ACCRUED LIABILITIES

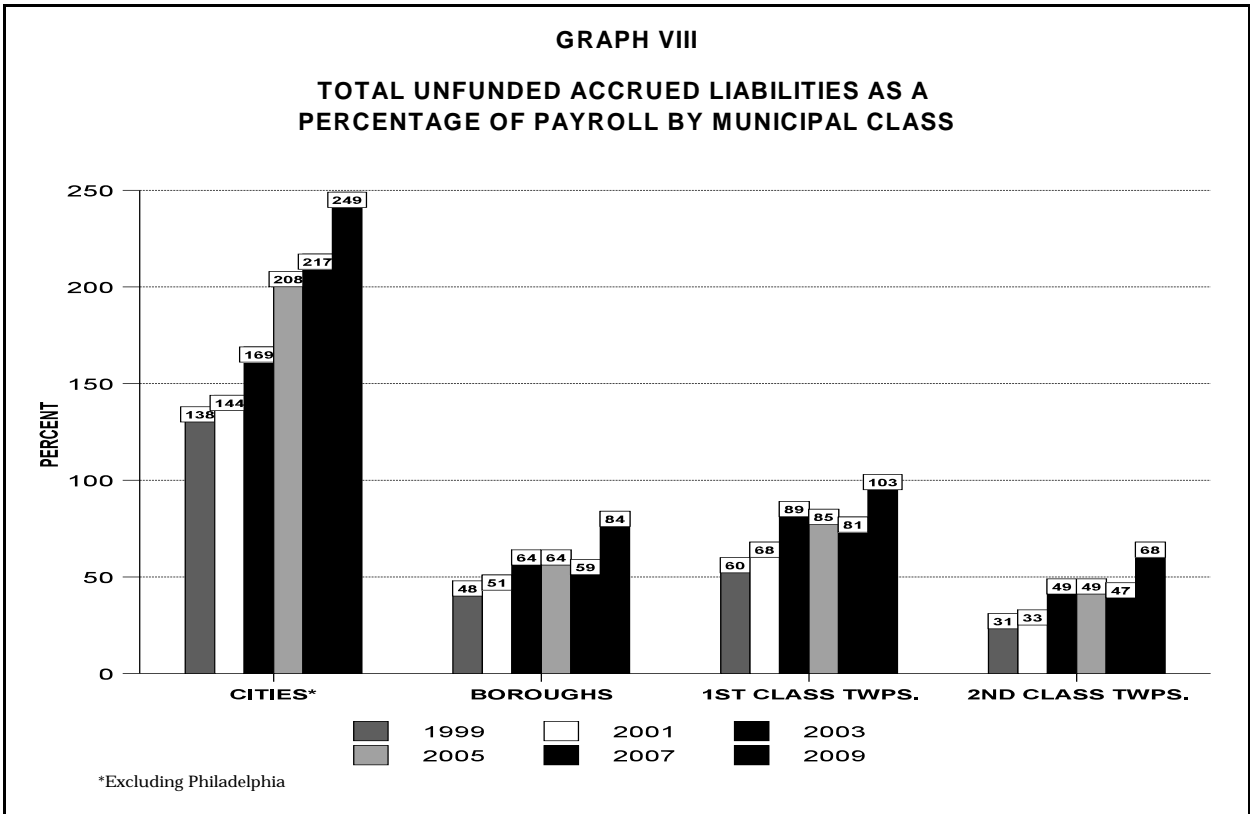

As the funded ratio of a pension plan decreases from 100 percent, the pension plan's assets cover an increasingly smaller percentage of the accrued liabilities. The funding shortfalls, termed unfunded actuarial accrued liabilities, may occur normally due to recognition of prior service credits, other benefit liberalizations, or actuarial experiences. A more recent cause for changes in the unfunded actuarial accrued liability is in the way a municipality reports its actuarial assets. By adopting an actuarial smoothing technique that averages asset values over a three to five-year period, the total losses and gains are not reflected immediately. Prior to the 2003 filing period, only about 3 percent of the pension plans used some type of smoothing. In the 2003 filing period, the percentage of pension plans using a smoothing technique increased to 30 percent. The number of pension plans using a smoothing technique in the 2005 filing period decreased to 20 percent, the 2007 filing period decreased to 16 percent, and the 2009 filing period increased to 48 percent. The changes in the smoothing rates fluctuate with the economics of the moment.

When a pension fund assumes a high rate of return and then consistently fails to achieve that return, it may lead to a cycle of investment losses and increased contributions that leaves the pension underfunded and municipal budgets in distress.

Another perspective on unfunded actuarial accrued liabilities may be obtained by examining them on a basis relative to the size of the municipality. Stating unfunded actuarial accrued liabilities as a percentage of payroll tends to offset the effect of inflation over time and allows for a comparison of differently sized pension

plans. For 1999, 2001, 2003, 2005, 2007 and 2009, Graph VIII shows the total unfunded actuarial accrued liabilities reported in each municipal classification expressed as percentages of the respective payrolls. Because of the overwhelming influence of Philadelphia's data, the City's data is not reflected in Graph VIII. As shown in Graph VIII, no class of municipality was exempt from the economic turmoil that occurred in 2008. The actual percentage increase in each of the municipal classifications between 1999 and 2009 was as follows: 80 percent in cities, 75 percent in boroughs, 72 percent in first class townships and 119 percent in second class townships. These increases in total unfunded actuarial accrued liabilities are generally viewed as being caused, to a considerable extent, by economic trends and the assumptions used by the municipalities in the pension plans to predict future costs. Although not shown in Graph VIII, the total unfunded actuarial accrued liabilities of cities declined from 342 percent of payroll in 1985 to 138 percent of payroll in 1999. The issuance of bonded debt accounted for about 85 percent of that reduction.

CONTRIBUTIONS TO MUNICIPAL PENSION PLANS

The data contained in Act 205 actuarial valuation reports include the actual contributions to the pension plan for the year prior to each valuation date. The trend in the aggregate contributions to municipal pension plans, excluding Philadelphia's pension plans, as reported in the 1997, 1999, 2001, 2003, 2005, 2007 and 2009 actuarial valuation reports, is presented in Graph IX. As evidenced in Graph IX, both member and State contributions have steadily increased since the 1997 filing period. While the reported municipal contributions decreased from \$102 million in 1997 to \$51 million in 2001 and have steadily increased to \$168 million in 2009, this apparent fluctuation in municipal contributions, which contrasts with the more steady progression of member and State contributions, results because municipalities are required to make whatever contributions are needed to satisfy the net Act 205 actuarial funding requirement after the member and State contributions have been deducted. These residual contributions by municipalities are, therefore, the only sources of municipal pension plan contributions that are directly affected by changes in the actuarial funding requirements. The actual impact on municipal contributions, for example, can be seen in the context of the inverse relationship between investment returns and actuarial funding requirements.

The high investment returns from 1996 through 1998 were a significant factor in the reduction of municipal contributions in the 1999 and the 2001 filing periods, and the lower investment returns experienced in 2001 and 2002 contributed to the increase in municipal contributions (\$8 million) reported in 2003. Although investment returns of 2003 through 2006 rebounded, the effects of the increased amortization payments that are now being realized are reflected in Graph IX. The devastating loss in 2008 is yet to be reflected in this graph, but if the 2001 losses are any indication of what is to happen, municipal contributions in the aggregate will rise nearly 200 percent in the next six years and that is assuming the stock market levels return to normal. Accordingly, municipal contributions are more prone to fluctuation than either member or State contributions, and the resulting unpredictability, which affects small municipal pension plans more acutely, makes budgeting for the actuarial funding requirements of municipal pension plans difficult.

In addition to the effect of investment returns on actuarial funding requirements and in turn municipal contributions, Graph IX also shows a reduction in the level of municipal contributions in 1999, which was attributable, in part, to the issuance of bonded debt by municipalities. Prior to the 1999 filing period, numerous municipalities funded all or part of the unfunded actuarial accrued liabilities of their pension plans through the issuance of bonded debt and significantly reduced or eliminated the associated annual amortization payments. Because amortization payments are a large component of a municipality's Act 205 actuarial funding requirement, the issuance of bonded debt significantly affected the reported municipal contribution levels, contributing to the significant reduction in 1999 and lowering the reported municipal contribution level in subsequent years. It is important to note that the issuance of bonded debt only shifts the burden of debt from the pension plan to the municipal government.

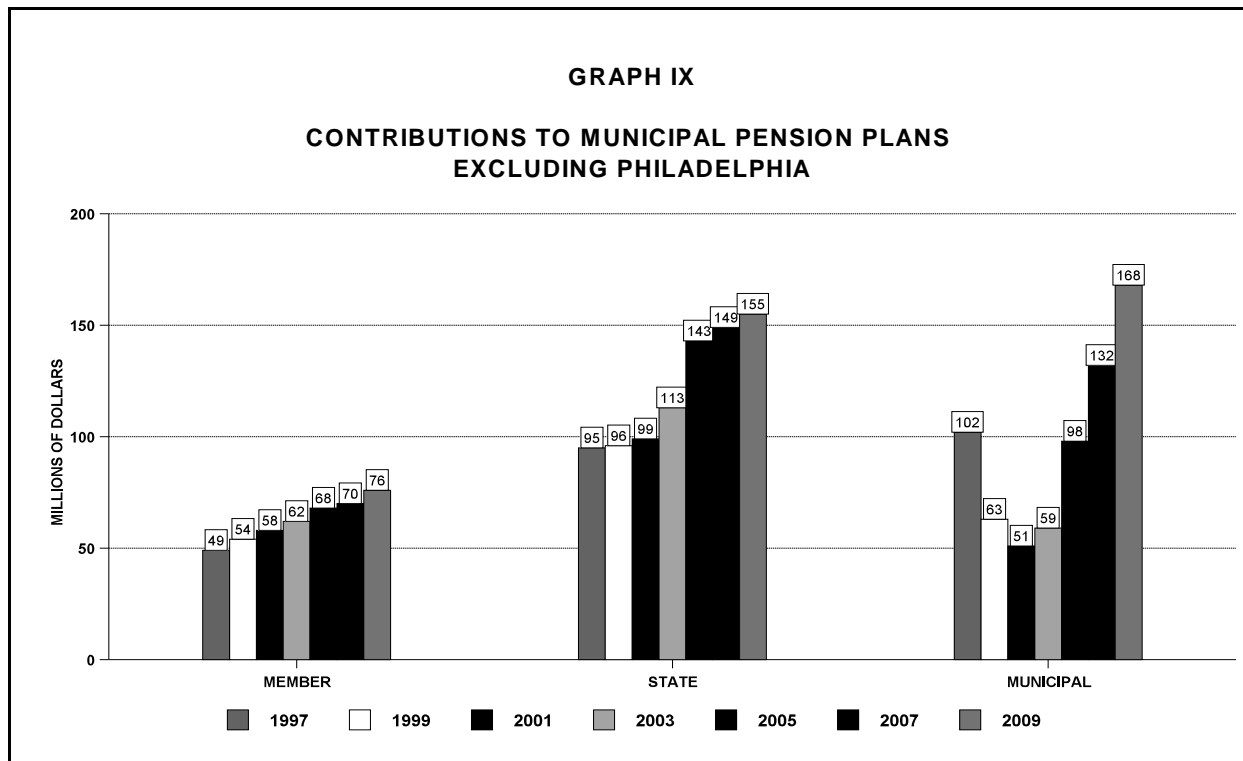

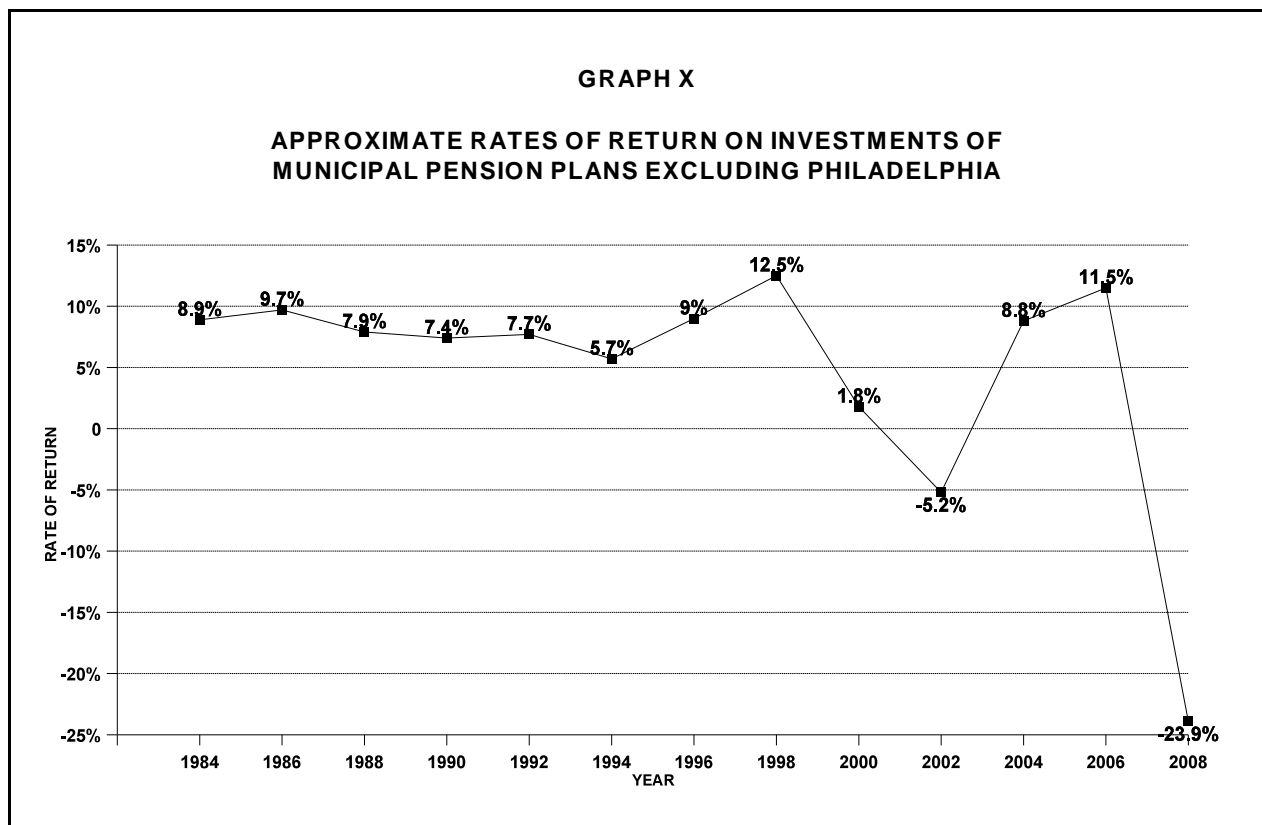

Chart V shows the dollar amount of the total funding provided by each source of contributions to municipal pension plans, excluding Philadelphia, for the 2007 and 2009 filing periods as well as the change in funding provided by each source of contributions between those years. As shown in Chart V, the total contributions to municipal pension plans increased approximately 13.9 percent between the 2007 and 2009 filing periods, with State contributions representing approximately 39 percent of the total contributions and both municipal and member contributions representing approximately 42 percent and 19 percent, respectively, of the total contributions.

CHART V
CONTRIBUTIONS TO MUNICIPAL PENSION PLANS EXCLUDING PHILADELPHIA

As % of Contributions	100.0	100.0	

RATE OF RETURN ON INVESTMENTS

The aggregate rate of return on investments for Pennsylvania's reviewable municipal pension plans, other than Philadelphia, was at -23.9 percent during the year 2008, as reported in the 2009 filing period. During the year 2008, the rate of return achieved in the pension plans maintained by individual classes of municipalities were as follows: -25.9 percent in cities, -23.3 percent in boroughs, -25.8 percent in first class townships, and -23.2 percent in second class townships. During the even-year period ending with the year 2008, the rate of return for all municipal classes, excluding Philadelphia, was approximately 4.8 percent, which is off from the 6.8 percent (weighted interest rate) assumed by the actuaries. The rate of return experienced by municipal pension funds in the past ten plus years reflect entry into the equity market by many municipalities that had not previously invested in equities. With continuing exposure to the more volatile returns typically experienced by equity investments, the average rate of return on municipal pension funds has shown to be less stable than the rates experienced between 1984 and 1994, as evidenced in Graph X.

COMPLIANCE WITH ACTUARIAL FUNDING STANDARD

The uniform actuarial funding standard implemented under Act 205 of 1984 was first effective for municipal pension plans in 1986. The 2009 Act 205 reports contained data on both the 2008 minimum municipal obligation (MMO) calculated for the pension plans and the actual municipal contributions to the pension plans in 2008. When a municipality contributes less than the Act 205 minimum municipal obligation to a pension plan, a funding deficiency is created. The Commission monitors compliance with the actuarial funding standard through the Act 205 reporting process and compiles compliance data in the biennial status reports, which enables the Commission to meet its statutory responsibility to disclose instances of noncompliance in a public report to the Governor and the General Assembly.

The January 1, 2009, actuarial valuation reports submitted for self-insured, defined benefit pension plans disclosed 87 instances of noncompliance with the Act 205 funding standard, and the Commission issued orders to the municipalities responsible for those 87 funding deficiencies to effect compliance with the Act 205 mandated funding standard. Data on the 87 funding deficiencies that occurred in 2008 is provided in Table IV, which displays the funding deficiencies as a dollar amount, as a percent of MMO, as a percent of total cost, and as a percent of payroll. Expressing the funding deficiency as a percentage of the MMO serves to show how much of the required municipal contribution was not contributed. Expressing the funding deficiency as a percentage of total cost, which is defined for this table as the normal cost plus the required amortization payments, permits the funding deficiency to be evaluated without regard to prior period deficiencies or member contributions and thus provides a measure of the significance or magnitude of the funding deficiency with respect to total annual funding requirements of the pension plan. Expressing the funding deficiency as a percentage of the annual payroll is a reliable means to evaluate the significance of the funding deficiency and makes a relative comparison among the municipal pension plans possible. For each pension plan reporting a funding deficiency, Table IV also discloses the funded ratio, or the pension plan's assets expressed as a percentage of its actuarial accrued liabilities, to provide a means of assessing whether the overall financial position of the pension plan is critical.

The funding deficiency data provided in Table IV should be considered with respect to the magnitude of the funding deficiency. Minimal funding deficiencies should not be cause for concern, although they do represent a means to alert responsible officials that increased administrative attention is necessary. Only in-depth, detailed assessments of the circumstances that resulted in the funding deficiencies in the individual pension plan can authoritatively determine if action is necessary to avoid recurrences.

In addition to the enforcement efforts for self-insured, defined benefit pension plans that were previously discussed, letters were issued to 46 defined contribution municipal pension plans, as reported in Table V, to provide notification of a possible funding deficiency in 2008. These letters were based on a significant reported deficiency between the calculated required contribution, according to an ordinance, resolution or plan document, and the reported actual municipal contribution. Enforcement activities by the Commission addressing defined contribution funding deficiencies helps to assure municipal employer adherence to promised funding levels of individual employee accounts, which directly affects employee retirement account balances on a year-to-year basis. The Department of the Auditor General was notified of both the defined benefit and the defined contribution funding deficiencies that occurred in 2008.

MAJOR ECONOMIC ASSUMPTIONS

Chart VI is a tabular distribution of the major economic assumptions used by actuaries in the preparation of Act 205 actuarial valuation reports submitted to the Commission during the 2009 filing period. The chart displays the minimum, maximum and arithmetic averages of the interest rate and the salary scale assumptions by plan size along with the frequency of each assumption within specified ranges. Actuarial calculations used to determine annual pension costs and liabilities are necessarily based on assumptions regarding future economic and demographic events.

The two major economic assumptions addressed by Act 205 used in the preparation of actuarial valuation reports are the assumption as to interest earnings and the assumption as to future salary increases. Together these two assumptions are the primary determinant in annual costs and future liabilities. Act 205 specifies a range of economic assumptions that must be used in preparing actuarial valuation reports. The economic actuarial assumption as to interest earnings may not be less than 5 percent or more than 9 percent, and where the pension benefit is salary related, the actuarial assumption as to salary projection may not be greater than the assumption as to interest and not less than the assumption as to interest reduced by 3 percent. If

assumptions outside of this range are used, the actuary must document that the specific experience of the plan that caused the actuary and the governing body to conclude that assumptions within the specified range are inappropriate and provide documentation that the particular assumptions chosen are appropriate for that plan. In the 2009 filing period, there were 21 plans with assumptions outside the specified range, up from 20 in the previous filing period. Chart VI does not show the change in economic assumptions between Act 205 filing periods. The arithmetic average assumptions (when weighted by asset values) as to interest rate and salary scale are shown in Chart VII for past filing periods.

CHART VI
INTEREST RATE AND SALARY SCALE ASSUMPTIONS ¹

Distribution by Asset Size							
Asset Size	No. of Plans	Interest Rate			Salary Scale		
		MIN	MAX	AVG	MIN	MAX	AVG
<= \$100,000	173	5.0%	8.0%	6.1%	3.0%	6.5%	4.6%
> \$100,000 - \$1,000,000	893	5.0%	8.5%	6.6%	2.0%	7.0%	4.6%

PART IV

IMPACT OF CHANGES IN STATE AID ALLOCATION

BACKGROUND

Prior to Act 205 of 1984, the Commonwealth used two inequitable formulas to annually distribute the Commonwealth monies available to aid municipalities in meeting their employee pension costs. Act 205 replaced the prior formulas with a single formula that was more efficient and equitable. Under Act 205, General Municipal Pension System State Aid (GMPSSA) is allocated annually to all municipalities (excluding municipal authorities) to defray the costs of providing employee pension benefits. Stated in a simplified manner, the Act 205 allocation formula first determines a “unit value” by dividing the total amount of money available for distribution by the total number of employee “units” reported by the individual municipalities. The unit value is then multiplied times the number of employee units reported by each eligible municipality to determine the individual municipal allocation amounts.

However, the Act 205 formula limits the annual allocation provided to the City of Philadelphia to 25 percent of the total amount of GMPSSA available for distribution. In the year 2010, the City of Philadelphia received State aid in the amount of \$54.5 million, which was the equivalent of an allocation equal to \$1,637 per unit. The municipalities that received State aid allocations in 2010 based on the unit value received \$3,235 per unit.

The Act 205 allocation formula also limits all individual State aid allocations to 100 percent of the annual pension costs payable by the recipient municipality. This limit or “cost cap” on the annual allocations was included in the Act 205 formula because of the wide variation in municipal pension costs. In some cases, lower municipal pension costs are the result of the excessive State funding provided under the prior allocation formulas that have substantially lowered or eliminated municipal pension costs for current employees. In other cases, lower municipal pension costs are attributable to the lower level of benefits being provided relative to the average municipal pension plan. In these and other situations, the allocation of State aid in excess of the annual municipal pension costs would provide funding where none is required and reduce the funding available for other municipalities. Therefore, the “cost cap” in the Act 205 allocation formula functions to ensure the efficient use of the available State aid and supports the program’s purpose — offsetting municipal pension costs.

Chart VIII shows the total allocations of State aid and the corresponding employee unit values since 1985, along with the number and percentage of municipalities whose pension costs were, or were not, fully funded by State aid. In the five-year period from 1985 through 1989, the total amount of State aid allocations almost doubled, and the unit value, which is used to determine individual allocations, increased from \$1,146 to \$3,269, reflecting an increase of about 185 percent. Chart VIII shows that less than half of the recipient municipalities consistently receive cost-basis allocations that fully fund their employee pension costs and this percentage is continually dropping.

CHART VIII

MUNICIPALITIES RECEIVING STATE AID AT FULL COST VERSUS UNIT VALUE

Year	Total Allocation	Municipalities Receiving Full Pension Costs		Municipalities Receiving Unit Value		Unit Value
1985	\$62.3 million	758	75%	253	25%	\$1,146
1986	\$78.4 million	632	63%	371	37%	\$1,624
1987	\$97.2 million	808	84%	154	16%	\$2,173
1988	\$109.0 million	922	94%	59	6%	\$2,746
1989	\$121.7 million	919	96%	43	4%	\$3,269
1990	\$115.9 million	824	87%	120	13%	\$2,501
1991	\$119.3 million	874	86%	143	14%	\$2,490
1992	\$121.4 million	818	78%	228	22%	\$2,331
1993	\$121.4 million	827	75%	277	25%	\$2,310
1994	\$122.9 million	783	70%	332	30%	\$2,286
1995	\$125.6 million	799	69%	361	31%	\$2,311
1996	\$127.5 million	739	58%	538	42%	\$2,200
1997	\$131.5 million	663	54%	564	46%	\$2,248
1998	\$129.2 million	861	65%	457	35%	\$2,437
1999	\$124.9 million	780	57%	580	43%	\$2,217
2000	\$133.3 million	983	71%	401	29%	\$2,751
2001	\$134.5 million	958	69%	436	31%	\$2,698
2002	\$150.6 million	916	64%	521	36%	\$2,763
2003	\$162.0 million	929	65%	499	35%	\$2,894
2004	\$190.5 million	724	49%	742	51%	\$2,911
2005	\$190.5 million	702	48%	767	52%	\$2,927
2006	\$ 198.6 million	719	48%	784	52%	\$3,088
2007	\$ 206.0 million	734	49%	754	51%	\$3,206
2008	\$ 206.6 million	702	47%	800	53%	\$3,186
2009	\$205.5 million	652	43%	857	57%	\$3,128
2010	\$217.9 million	519	34%	997	66%	\$3,235

OPERATION OF THE ACT 205 ALLOCATION FORMULA

A cost-basis allocation occurs when a municipality's allocation is subjected to the "cost cap" and, as a result, fully funds the recipient municipality's pension costs. A unit-basis allocation occurs when a municipality's allocation is determined by the standard formula (total units X unit value = allocation) and, as a result, partially funds the recipient municipality's pension costs. As originally conceived in 1984, the Act 205 formula was expected to determine the State aid allocations predominately on a unit basis, with only a relatively few cost-basis allocations needed to ensure the efficient use of GMPSSA. In practice, the Act 205 formula operated to provide State aid allocations determined on a cost basis in about half of the cases. This undesirable effect of the operation of the Act 205 allocation formula was caused by the large, unanticipated growth in the State revenues used to provide GMPSSA and the corresponding increases in the unit value. Today, however, only 34 percent of the municipalities or 8 percent of the active membership is receiving a cost-basis allocation, because the amortization portion of the pension costs are increasing faster than total allocations used to fund State aid.

Because of the high frequency of instances where State aid fully funded municipal pension costs in the past, the orientation of municipal officials to their employee pension plans changed. Because local tax revenues in many cases were not required to finance employee pension benefits, municipal officials became more willing to grant increased pension benefits. In addition, municipal officials were more likely to increase pension benefits in lieu of other forms of compensation because, unlike the other forms of compensation, the pension benefits could be increased at no cost to the municipality. This same inducement for municipal officials was present for reducing member contributions, since the increase in employer pension costs that normally results with reductions in member contributions would be fully funded by State aid. With today's economy, municipalities will likely create new plans for new hires at a lower pension benefit or possibly eliminate the pension plan where possible.

We can conclude that the GMPSSA program has successfully redressed the inequities and inefficiencies of the prior allocation formulas.

PART V

THE NEW RECOVERY PROGRAM

OVERVIEW

Act 44 of 2009 was signed into law by the Governor on September 18, 2009, and makes significant changes to the Municipal Pension Plan Funding Standard and Recovery Act (Act 205 of 1984). Acknowledging the current economic climate, Act 44 makes available a number of actuarial tools intended to provide short-term fiscal relief to local governments operating public pension plans.

Under the previous "Recovery Program," a municipality had the option to elect participation in the program and utilize the recovery remedies available. A municipality's assigned distress score was based on a complex calculation involving actuarial data from pension plan report(s) and municipal financial data. The new law dictates that every municipality with a pension plan have a distress score calculated and be assigned a corresponding distress level, with mandatory remedies, voluntary remedies or no remedies available.

The Act 44 distress score is based upon the aggregate funded ratio of a municipality's pension plan(s), as reported in the municipality's Act 205 Actuarial Valuation Report(s). The funded ratio is determined by dividing the total actuarial assets of the pension plans by the total actuarial liabilities, and stated as a percentage. If a municipality operates both defined benefit (DB) and defined contribution (DC) pension plans, all pension plans (including DC plans) are used in the calculation of the total assets and liabilities. The corresponding score and distress level of the funded ratio are shown in Chart IX.

Chart IX

DISTRESS SCORING

Funded Ratio	Score	Distress Level	Election Form
90% and above	0	None	No election form
70% to 89%	1	Level 1 (Minimal)	Voluntary Remedies
50% to 69%	2	Level 2 (Moderate)	Mandatory and Voluntary Remedies
Less than 50%	3	Level 3 (Severe)	Mandatory and Voluntary Remedies

Municipalities with a funded ratio of 90% or above will have a distress score of zero (0), with no mandatory or voluntary remedies available. Outlined below are the remedies that may be elected for each distress level. If no election form is submitted the Commission assumes no voluntary remedies have been elected, but the mandated remedies must be implemented.

Level 1 (Minimal Distress)

Voluntary Remedies -

- Aggregation of pension funds for administration and investment
- Establishment of total member contributions
- Deviation from municipal contribution limitations
- May pay 75% or more of the amortization requirement for 2 years
- Increase in the asset smoothing corridor from 20% to 30% for an additional 2 years (expires on 12/31/2012, whether elected or not elected)

Level 2 (Moderate Distress)

Voluntary Remedies -

- Establishment of total member contributions
- Deviation from municipal contribution limitations
- Utilization of the special taxing authority under Act 205
- Establishment of a revised benefit plan for newly hired employees
- May pay 75% or more of the amortization requirement for 4 years
- Increase in the asset smoothing corridor from 20% to 30% for an additional 4 years (expires on 12/31/2014, whether elected or not elected)

Mandatory Remedies -

- Aggregation of pension funds for administration and investment
- Submission of a plan for administrative improvement

Level 3 (Severe Distress)

Voluntary Remedies -

- Establishment of total member contributions
- Deviation from municipal contribution limitations
- Utilization of the special taxing authority under Act 205
- May pay 75% or more of the amortization requirement for 6 years
- Increase in the asset smoothing corridor from 20% to 30% for an additional 4 years (expires on 12/31/2014, whether elected or not elected)

Mandatory Remedies -

- Aggregation of pension funds for administration and investment
- Establishment of a revised benefit plan for newly hired employees
- Submission of a plan for administrative improvement

To better understand the results of the “new” distress score, the following charts break down the distress scores by level and municipal class. It is clearly evident that Level 3 has the least amount of plans, but the highest percentage of active members. This data includes the City of Philadelphia which is exempt from mandatory remedies until January 1, 2016, but must file an annual actuarial valuation report every year they are exempt.

CHART X

DISTRESS SCORE BY DISTRESS LEVEL

Level	# of Municipalities	% of Municipalities	# of Active Members	% of Active Members
0 (Not Distressed)	776	53.9%	13,158	18.4%
1 (Minimal)	474	32.9%	20,373	28.6%
2 (Moderate)	162	11.3%	5,146	7.2%
3 (Severe)	27	1.9%	32,685	45.8%
	1,439		71,362	

The group of municipalities that is not considered distressed consists of 776 municipalities (53.9%), but only 13,158 active members (18.4%).

CHART XI

CLASS OF MUNICIPALITY AT DISTRESS LEVEL 0

Class	# of Municipalities	% of Municipalities	# of Active Members	% of Active Members
Cities	15	1.0%	1,392	2.0%
Boroughs	315	21.9%	4,059	5.7%
1 st Class Townships	43	3.0%	2,449	3.4%
2 nd Class Townships	235	16.3%	3,205	4.5%
Authorities	149	10.4%	1,826	2.6%
Regionals/COGs	19	1.3%	227	0.3%
	776		13,158	

The group of municipalities that is considered minimally distressed consists of 474 municipalities (32.9%) and 20,373 active members (28.6%).

CHART XII

CLASS OF MUNICIPALITY AT DISTRESS LEVEL 1

Class	# of Municipalities	% of Municipalities	# of Active Members	% of Active Members
Cities	28	2.0%	5,251	7.4%
Boroughs	147	10.2%	4,150	5.8%
1 st Class Townships	35	2.4%	2,625	3.7%
2 nd Class Townships	193	13.4%	4,321	6.1%
Authorities	62	4.3%	3,800	5.3%
Regionals/COGs	9	0.6%	226	0.3%
	474		20,373	

The group of municipalities that is considered moderately distressed consists of 162 municipalities (11.3%) and 5,146 active members (7.2%).

CHART XIII

CLASS OF MUNICIPALITY AT DISTRESS LEVEL 2

Class	# of Municipalities	% of Municipalities	# of Active Members	% of Active Members
Cities	10	0.7%	1,813	2.5%
Boroughs	41	2.8%	675	0.9%
1 st Class Townships	11	0.8%	782	1.1%
2 nd Class Townships	74	5.1%	944	1.3%
Authorities	21	1.5%	842	1.2%
Regionals/COGs	5	0.3%	90	0.1%
	162		5,146	

The group of municipalities that is considered severely distressed consists of 27 municipalities (1.9%) and 32,685 active members (45.8%). The severely distressed plans include the larger cities, which have 45.6% of the active members at this level. There are other classes reported as severely distressed, but the majority of these plans are less than 10 years old and have given past service credits to the participating employees. Giving past service credits creates a large liability that must be paid off over the remaining working life of the employee with the average remaining working life of less than fifteen years. The shorter working life increases the amortization payment, thus increasing the municipalities' minimum municipal obligation.

CHART XIV

CLASS OF MUNICIPALITY AT DISTRESS LEVEL 3

Class	# of Municipalities	% of Municipalities	# of Active Members	% of Active Members
Cities	3	0.2%	32,524	45.6%
Boroughs	3	0.2%	7	0.0%
1 st Class Townships	0	0.0%	0	0.0%
2 nd Class Townships	19	1.3%	89	0.1%
Authorities	2	0.1%	65	0.1%
Regionals/COGs	0	0.0%	0	0.0%
	27		32,685	

Act 44 requires the Commission to calculate distress scores for each biennial filing period. A municipality's score may remain the same, improve or worsen upon the next filing period. If a municipality's score improves, it may continue to utilize the longer time frames for amortization reduction and asset valuation applicable to the previous distress level. If a municipality's distress level, worsens the amortization reduction and the asset valuation will be extended by the difference between the time period allowed for the previous distress level and the current distress level. All other remedies elected and implemented may be continued.

PART VI

MUNICIPAL PENSION BILLS ENACTED SINCE THE LAST STATUS REPORT

ACT 44 OF 2009 (HOUSE BILL NUMBER 1828, PRINTER'S NUMBER 2638)

Amends the Municipal Pension Plan Funding Standard and Recovery Act (Act 205 of 1984) to: 1) permit, but not require, county pension plans to use any reasonable actuarial assumptions or methodologies provided for in Act 205; 2) mandate revised amortization schedules applicable to all future unfunded actuarial accrued liabilities incurred by municipal pension plans; 3) provide for optional, alternative, expanded asset smoothing methods for determination of the actuarial value of assets; 4) establish a new distress determination method using the pension plan ratio of assets to liabilities, based upon the most recent actuarial valuation report; 5) establish three new levels of distress (Level I - minimal, Level II - moderate and Level III - severe) with corresponding voluntary and mandatory remedies dependent upon the severity of distress; 6) clarify the limitations on the uses of the special municipal taxing authority currently provided under the Act, and in the case of a municipality utilizing the proceeds from the special tax to fund other post-employment benefits (OPEBs), require the inclusion of OPEB liabilities in the actuarial valuation report filed with the Commission and in the calculation of the municipality's Minimum Municipal Obligation (MMO); 7) establish conduct and disclosure standards for professional service contracts, requiring municipal pension systems to adopt procedures to advertise and review proposals for contracts for professional services; 8) exempt the City of Philadelphia from the mandatory provisions of the new Act 205 recovery program until January 1, 2016; 9) permit, but not require the City of Philadelphia to re-amortize all of the unfunded actuarial accrued liabilities in the City's pension plans over a 30-year period using level-dollar amortization payments; 10) over a multi-year period, permit the City of Philadelphia to defer payment of a portion of the City's MMO and mandating a repayment schedule applicable to any amounts deferred; 11) permit the City of Philadelphia to temporarily impose a local sales and use tax of 1%, with any moneys received from the sales and use tax being used only to pay the City's MMO; 12) require the City of Philadelphia to comply with certain provisions of the bill, with failure to comply resulting in the withholding of certain State grants, loans and entitlements in an amount equal to the deferral amount not repaid; 13) permit the City of Pittsburgh to impose a parking tax of 37.5%, with 6.75% of any moneys received from the parking tax being used only to pay the City's MMO; 14) permit the City of Pittsburgh to impose an additional 2.5% parking tax if the City sells or leases any of its parking garages with net proceeds to be deposited with the Pennsylvania Municipal Retirement System (PMRS) on behalf of the City; 15) mandate the transfer of administration of the City of Pittsburgh's pension plans to PMRS if the City is determined to be Level III distress on January 1, 2011; 16) provide for the establishment of deferred retirement option plans (DROPs) by PMRS for its participating local governments; 17) authorize a local government with a defined benefit pension plan to establish a DROP as part of the plan; 18) prohibit future participation in DROPs by elected officials; and 19) provide for the designation of an active member's spouse as beneficiary regardless of date of marriage.

Amendments Applicable to All Plans

- The Act mandates revised amortization schedules applicable to all future unfunded actuarial accrued liabilities incurred by municipal pension plans.

Effective immediately and included in the 2009 Actuarial Valuation Report (AVR):

Actuarial Gains/Losses - Increases from 15 to 20 years

Effective for changes made on or after September 18, 2009, and included in the 2011 AVR:

Change in Assumptions - Decreases from 20 to 15 years

State Mandated Benefit Changes - 20 years

Local Benefit Changes for Active Employees - 10 years

Local Benefit Changes for Retired Employees - 1 year

- Effective immediately, the Act provides for optional, alternative, expanded asset smoothing methods for determination of the actuarial value of assets. For the two-year valuation period beginning in 2009, the Act allows an expansion of the asset smoothing corridor for recognition of gains and losses from 20% to 30% for all municipalities.
- Adoption of new smoothing techniques or change of current smoothing methods shall be amortized as changes of actuarial assumptions. The use of the smoothing corridor will be amortized as an actuarial gain or loss.

ACT 51 OF 2009 (SENATE BILL NUMBER 369, PRINTER'S NUMBER 1478)

Amends the Emergency and Law Enforcement Personnel Death Benefits Act to: 1) mandate payment of a killed-in-service death benefit to the surviving spouse or, if there is no surviving spouse, the minor child of a paid firefighter, ambulance service or rescue squad member, or law enforcement officer in an amount equal to the decedent's monthly salary (adjusted annually by an amount equal to the increase in the Consumer Price Index), less the amount of any workers' compensation or pension benefit payable to an eligible beneficiary; 2) repeal Section 5(e)(2) of the Municipal Police Pension Law (Act 600 of 1955) which currently provides the killed-in-service death benefit applicable only to members of Act 600 pension plans; and 3) repeal Sections 202(b)(3)(vi) and (4)(vi) of the Municipal Pension Plan Funding Standard and Recovery Act (Act 205 of 1984) which provides for a special extended amortization period applicable to the funding of liabilities resulting from the payment of the Act 600 killed-in-service benefit.

DATA TABULATIONS

The following tables are self-explanatory with the exception of columns labeled "PLAN TYPE". To indicate the type of employee covered by the pension plan, the plan column uses "P" for police officers, "F" for firefighters, and "N" for nonuniformed employees. In instances where more than one pension plan is maintained for an employee type, a numeric code is appended to the letter code for employee type to identify the individual pension plan. To indicate the type of benefit plan, the type column uses a letter code (A, B or C). The letter code "A" indicates a defined contribution pension plan or a pension plan without a defined benefit structure or defined contributions. The letter code "B" indicates a defined benefit pension plan that is fully-insured. The letter "C" indicates a defined benefit pension plan that is self-insured in whole or in part. And the letter code "U" indicates a Taft-Hartley Act collectively bargained, jointly trustee, multi-employer pension plan governed primarily by the federal Employee Retirement Income Security Act of 1974 (ERISA). An asterisk in a data column indicates a value that cannot be calculated or data that is not applicable.

¹ Where the aggregate actuarial cost methodology is used, the amount shown in the column "Accrued Liability" represents the difference between the actuarial present value of future benefits and the actuarial present value of future normal costs.

² The term "Funded ratio" is calculated as a measure of funded condition, only where the entry age normal actuarial cost methodology is used.

TABLE III

General Data Summary for Local Government Pension Plans

	MUNICIPAL PENSION PLANS	COUNTY PENSION PLANS	TOTAL
Active Members	78,098	58,827	136,925
Actuarial Accrued Liabilities	\$18,926,649,610	\$7,202,907,183	\$26,129,556,793
Assets	\$11,957,415,704	\$6,972,999,944	\$18,930,415,648
Unfunded Actuarial Accrued Liabilities	\$7,197,030,510	\$290,730,513	\$7,487,761,023
Assets Exceeding Actuarial Accrued Liabilities	\$227,796,604	\$60,823,278	\$288,619,882

SURVEY RESULTS

The Commission sent a questionnaire regarding Other Post-Employment Benefits (OPEBs) to all municipalities with a defined benefit pension plan. The data is being gathered to obtain an understanding of how many municipalities are offering OPEBs. The results as of November 2010 are listed below.

Survey Results on Municipalities' Other Post-Employment Benefits

Municipal Class	Yes	No	Response Not Filed
City	27	8	21
Borough	95	270	141
1 st Class Township	44	16	29
2 nd Class Township	79	315	143
Authority	34	126	75
Regional/COG	9	16	9
